1. ABSTRACT

In the Farm Management System (FMS), as a farmer, farm manager, or system administrator, I want to use a centralized Salesforce-based platform to record and manage farm, crop, farmer, and buyer information so that all agricultural data is stored securely and systematically. I want to enter and update farm details, crop production records, and buyer transactions easily through a user-friendly interface with proper validation rules to prevent incorrect entries. I also want the system to generate real-time reports and interactive dashboards so that I can analyze farm productivity, monitor sales, and make informed decisions. Additionally, I want role-based access and secure data storage to ensure that sensitive information is protected while enabling smooth collaboration among users. This system will help reduce manual paperwork, minimize errors, improve efficiency, and support data-driven farm management.

2. INTRODUCTION

Farm Management System (FMS) is a Salesforce-based application designed to digitize and streamline agricultural operations. It manages data related to farms, crops, farmers, and buyers while providing real-time insights through reports and dashboards. The system helps farmers and managers monitor agricultural activities efficiently and make informed decisions.

3. PURPOSE

The main purpose of this project is to:

- Digitize agricultural data management
- Improve data accuracy and accessibility
- Automate record handling
- Enable real-time monitoring
- Support data-driven farming decisions
- Enhance productivity and transparency

4. DATA FLOW DIAGRAM

Data Flow:

User → Salesforce UI → Custom Objects (Farm, Crop, Farmer, Buyer) → Validation Rules → Relationships → Reports → Dashboards

5. PROPOSED SYSTEM

The Farm Management System (FMS) in Salesforce is a comprehensive solution designed to digitize and streamline agricultural operations. This application empowers farmers, farm managers, and stakeholders by managing data related to crops, Farm, Farmer, and buyers, while providing actionable insights through reports, and dashboards.

6. PROJECT PLANNING

- Created Salesforce Developer Org
- Developed custom objects
- Configured tabs and Lightning App
- Created fields and relationships
- Designed profiles and roles
- Created users and sharing rules
- Developed reports and dashboards
- Conducted testing and reviews

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce interface to verify system functionality. The following were tested:

- Creation of Farm, Crop, Farmer, and Buyer records
- Validation of input fields
- Relationship and dependency checks
- Profile and role access testing
- Sharing rule verification
- Report and dashboard generation

Performance testing ensured smooth system response and stability during multiple user operations.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data system
- Reduced paperwork
- Improved accuracy
- Better monitoring
- Real-time analytics

Disadvantages

- Requires internet connection
- Salesforce license dependency
- Limited offline access

9. HARDWARE REQUIREMENTS

- **Processor:** Intel Core i3 or above
- **RAM:** 4 GB or above
- **Hard Disk:** 250 GB or above
- Keyboard and Mouse
- Monitor

10. CONCLUSION

The Farm Management System successfully digitizes agricultural data management using Salesforce. It improves efficiency, reduces errors, and enables farmers and managers to make informed decisions through automation and analytics.

11. FUTURE SCOPE

- Mobile application integration
- AI-based crop prediction
- Weather data integration
- IoT sensor connectivity
- Government scheme integration
- Market price forecasting

12. APPENDIX

- **Source Code:** Salesforce Configuration and Metadata
- **Dataset:** Farm, Crop, Farmer, and Buyer Records
- **Tools Used:** Salesforce Developer Org

Thank You

Screenshot 2: Activity 4 - Creation of Buyer Object

The screenshot displays the Skill Wallet web application interface. On the left is a blue sidebar with the 'SKILL WALLET' logo and a navigation menu containing 'Dashboard', 'Skill Bank', 'Skill Wallet' (highlighted), 'Skill Card', and 'Skill Credits'. The main content area has a white header 'Farm Management System'. Below this, the title 'Activity 4: Creation of Buyer object' is shown, followed by a 'Story' tag and a 'Duration: 10m' tag. An orange circle with 'BH' indicates the activity is assigned to 'Bharathiraja J'. A 'Description' section contains a list of three steps: 1. Click on the gear icon and then select Setup. 2. Click on the object manager tab just beside the home tab. 3. After the above steps, have a look on the extreme right y... that and select Custom Object. a. On the Custom Object l...
